## **DETAILED ACTION**

### ***Response to Amendment***

1. The preliminary amendment filed under 37 CFR 1.53(b) on October 3, 2003 is acknowledged and the amendment have been placed in the file.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 40-55 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,395,623. Although the conflicting claims are not identical, they are not patentably distinct from each other because the following reasons:

Claims 40-55 of the instant application are essentially claimed in the claimed limitations of claims 1-12 of U.S. Patent No. 6,395,623 the limitation includes simultaneous etching of the oxide layer and nitride layer at the same rate.

4. Claims 40-55 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6,635,558. Although the conflicting claims are not identical, they are not patentably distinct from each other because the following reasons:

Art Unit: 2823

Claims 40-55 of the instant application are essentially claimed in the claimed limitations of claims 1-16 of U.S. Patent No. 6,635,558 the limitation includes simultaneous etching of the oxide layer and nitride layer at the same rate.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure Lim (US/5,985,711) also disclose similar inventive subject matter.
